

AI AUTOMATION · IN-HOUSE PRESENTATION

Save money on every *repair*.

An AI system for NG Homes, built by GroAI. It answers every repair, rent query and enquiry the moment it arrives — day or night — cutting the cost of handling them and giving your team their time back.

£175k

SAVED A YEAR · EST.

WHAT IT COSTS TODAY

Every repair costs more than *the fix*.

A tenant taps "report a repair" — and it still lands on a person to log, triage and book. Thousands of times a year. Through **one line, open just Mon–Fri 9–4.30**. The cost of simply **handling contact** runs into six figures.

OPEN · 37.5 hrs
Mon–Fri 9–4.30

CLOSED · 130.5 hrs / week
Evenings, weekends & peaks — a missed call is tomorrow's job

YOUR APP — EVERY TAP STILL ENDS WITH A PERSON

THE ~£250K, BROKEN DOWN

Repairs are the *biggest cost*.

Estimated annual staff cost of handling each type of contact — ~50,000 calls a year at ~£5 each. **Repairs alone is ~£100k.**

Why repairs first: it's the highest volume and the most repetitive — report, triage, book, confirm — which makes it both the biggest cost and the easiest for AI to take off your team's plate.

WHAT WE'D BUILD

An AI team that never *clocks off*.

Four connected systems, plugged into the tools you already use — **repairs first**, where the volume and cost sit.

01 · SAVES THE MOST

Repairs triage & booking

Takes the report, sorts it — emergency, urgent or routine — books the slot and confirms it, straight into your repairs system. No staff time on routine logging.

02

24/7 voice & web agent

Answers every call and message the second it arrives, in plain patient language, any hour. No queue, no voicemail, no missed jobs.

03

Tenant comms, automated

Rent reminders, arrears outreach, appointment confirmations and updates — sent for you, tracked, logged to the tenancy.

04

Documents & reporting

Letters, notices and the regulator (ARC) returns drafted automatically from your own data — ready to check and send.

HOW IT WORKS

Every tenant answered *in seconds*.

WHAT IT HANDLES ON ITS OWN

Your team stays in control. Anything sensitive — a vulnerable tenant, arrears, a complaint — goes straight to the right person, with everything already captured. The AI carries the volume; your people carry the care.

ONE REPAIR, REPORTED

The same job — *a fraction of the cost.*

TODAY · HANDLED BY A PERSON

- Tenant waits in the queue (office hours only)
- Staff answer, take details, ask questions
- Log it, triage the priority, find a slot
- Book it and confirm — ~8–10 minutes each

~£5

staff cost per repair reported

WITH GROAI · HANDLED BY AI

- Answered instantly — any hour, no queue
- Details captured & priority sorted automatically
- Booked and confirmed into your repairs system
- Staff only see it if it needs a person

~£0

staff time on a routine repair

~20,000 repairs reported a year.
Automate the routine...

~£80,000

SAVED ON REPAIRS ALONE

REAL TENANT MOMENTS

What it looks like *on the day.*

9PM SUNDAY

Burst pipe, out of hours

NOW Line's closed — a voicemail, and water damage worsening overnight.

GROAI Answered instantly, logged as an emergency, out-of-hours contractor dispatched, tenant reassured.

→ **Damage — and the cost of it — avoided**

60-SECOND JOB

"What's my rent balance?"

NOW Tenant waits in the queue; ~4 minutes of staff time to look it up.

GROAI Instant, accurate answer — and can take the payment there and then. Zero staff time.

→ **Multiply by thousands a year**

NO CALL NEEDED

"Has my repair been booked?"

NOW Another call for a person to answer and look up the job.

GROAI Instant status update, day or night — the chase call never reaches your team.

→ **Fewer repeat calls clogging the line**

PROACTIVE

Rent arrears

NOW Manual, inconsistent chasing — squeezed in around everything else.

GROAI Gentle reminders sent automatically; the tenants who need real help flagged to your team.

→ **Staff spend the time on the conversation**

COST OF HANDLING CONTACT · PER YEAR

From ~£250k
to ~£75k.

Automating ~70% of contact cuts the annual cost of handling it by around **£175,000** — money and hours handed straight back to tenants and the team.

~£80k

On repairs alone

~70%

Handled by AI

22→100%

Week covered

You already complete **90.1% of repairs right first time** — above the Scottish average. We protect and extend that, at a lower cost to deliver.

PHASED ROLLOUT · SAVINGS THAT COMPOUND

It grows with *every phase*.

Start where the saving is biggest, prove it, then widen — each phase automates more and hands back more, without adding a single member of staff.

Phase 1 — Repairs line. The biggest, fastest win. ≈ £80k/yr.

Phase 2 — All lines, 24/7. Rent, applications, general. ≈ £175k/yr.

Phase 3 — Comms & reporting. Full automation. ≈ £205k/yr.

LIVE, NOT THEORY

THE RECOMMENDATION

Start with *repairs*. Then scale.

The biggest saving and the fastest to prove. We build and run the repairs line first — live, on real calls — then widen across every channel. You've served North Glasgow since **1976** and you outperform the Scottish average; our job is to **protect that and cut what it costs to run.**

Protect what you've built.
Cut what it costs to run.
