

AI ACROSS YOUR WHOLE OPERATION · IN-HOUSE PRESENTATION

Automate the whole *operation*.

From the tenant on the phone, to the operative on site, to the report on the regulator's desk — one connected system, built by GroAI. Not just a phone line — your whole business, running with less manual work.

PRESENTED TO NG HOMES · NORTH GLASGOW HOUSING ASSOCIATION · SEPTEMBER 2026

£250k+

SAVED A YEAR · EST.

WHERE THE WORK — AND COST — HIDES

It's not just the *phones*.

Across NG Homes, work still moves by hand. Tenants call and wait. Operatives log and update jobs on paper or over the phone. Staff chase status. Letters and regulator returns are written from scratch. **Every step is time, cost and delay** — and it adds up right across the business.

OPEN · 37.5 hrs
Mon–Fri 9–4.30

CLOSED · 130.5 hrs / week

And that's only the front door — the admin behind it never stops

~5,450

Homes to look after

~50,000

Tenant contacts / yr

~20,000

Repairs to dispatch / yr

6-figure

Admin cost, a year

ONE TAP FROM A TENANT SETS OFF A CHAIN OF MANUAL WORK

WHAT WE BUILD FOR COMPANIES

Far more than a *phone line*.

We build complete AI systems across a business. Here's the toolkit we'd bring to NG Homes — pick what moves the needle first.

01 AI voice agents
Calls answered 24/7

02 Chat & web assistants
Instant answers online & in-app

03 Field workforce apps
Operatives run jobs from site

04 Job & SLA tracking
Every task tracked to completion

05 Internal comms
Teams coordinated, nothing dropped

06 External comms
Tenants & stakeholders kept informed

07 Tenant & client services
End-to-end service management

08 Self-service portals
Tenants sort things themselves

09 Documents & letters
Notices & correspondence, drafted

10 Regulator (ARC) reporting
Returns built from live data

11 Dashboards & data
The whole operation, live

12 Back-office automation
Allocations, arrears, factoring

+ **websites, integrations and whatever your operation needs — one studio, plugged into the systems you already run.** We build this range across fire & security, utilities, construction, retail and interiors. NG Homes gets the finished capability, not an experiment.

TENANT · WORKFORCE · BACK OFFICE

One connected *loop*.

Every part talks to the next — so a repair reported at 11pm is triaged, dispatched, done and reported *without anyone re-keying a thing*.

The whole chain, automated. Today each hand-off is a phone call, a form or a note. We connect them end to end — tenants, operatives and the office all working from one live picture.

THREE SIDES, ONE SYSTEM

It works for *everyone* at once.

FOR YOUR TENANTS

Instant, 24/7

- Report a repair, any hour
- Rent balance & payments
- Apply for a home, ASB, advice
- Answered in seconds, no queue

FOR YOUR WORKFORCE

Paperwork gone

- The day's jobs on their phone
- Update & complete from site
- Add photos & notes instantly
- No end-of-day admin

FOR THE BACK OFFICE

The admin, done

- Allocations & arrears outreach
- Complaints & factoring
- Letters, notices & ARC returns
- Live dashboards for the team

One system, not three tools. Tenants, operatives and staff all working from the same live record — which is exactly why nothing gets dropped, chased twice, or re-typed.

FROM THE VAN TO THE TENANT

The operative updates once. Everyone *knows*.

TODAY

- Operative fills in a paper sheet or phones the office
- Someone re-keys it later — if it doesn't get lost
- Tenant is left guessing when anyone's coming
- Status is a day behind, and failed visits repeat

WITH GROAI

- Operative taps "on the way / done" in the app on site
- The tenancy record updates itself — instantly
- The tenant is told automatically, in real time
- The office sees it live; the report writes itself

THE TENANT HEARS FROM YOU — WITHOUT ANYONE LIFTING THE PHONE

MONEY & TIME SAVED · PER YEAR

~£250k back,
across the *operation*.

Illustrative and conservative. The saving isn't only the phones — it's the admin behind every job, right across the business.

22→100%

ESTIMATED ANNUAL SAVING, BY AREA

Tenant contact & repairs

~£175k

Field workforce & scheduling

~£45k

Back office & reporting

~£35k

Plus the wins that don't show on a spreadsheet: **fewer failed visits, faster repairs, tenants kept informed** — straight into your 90.1% right-first-time and satisfaction scores.

ACROSS THE WHOLE OPERATION

What it looks like *on the day.*

TENANT · 9PM SUNDAY

Burst pipe, out of hours

NOW Line's closed — a voicemail, and damage worsening overnight.

GROAI Logged as emergency, out-of-hours operative dispatched, tenant reassured.

→ **Damage — and cost — avoided**

WORKFORCE · ON SITE

Repair finished at the door

NOW Paper sheet, phone the office, re-keyed later — or lost.

GROAI Tapped "complete" with a photo; record, tenant & report all update at once.

→ **No end-of-day admin**

TENANT COMMS

"Is someone still coming?"

NOW An anxious chase call your team has to field.

GROAI Tenant already had "on the way" — automatically. The call never happens.

→ **Fewer chase calls, happier tenants**

BACK OFFICE

The ARC return

NOW Weeks of pulling numbers together by hand.

GROAI Drafted automatically from live data — ready to check and submit.

→ **Days of work, gone**

WE ALREADY DO THIS

Built for companies across *industry*.

Voice agents, workforce apps, websites, document systems, dashboards and automation — live and running across very different sectors.

Volt Group
ELECTRICAL

Proven
LIVE, NOT THEORY

THE RECOMMENDATION

Start with *repairs*, end to end.

The biggest saving and the fastest to prove — the whole loop, tenant to operative to report, live on real jobs. Then widen across every channel. You've served North Glasgow since **1976** and you outperform the Scottish average; our job is to **protect that and cut what it costs to run.**

Protect what you've built.
Cut what it costs to run.
