

THE PROOF

We don't pitch ideas. We build businesses.

Before we talk about Dan, here's what we've already built for others.

Real people, real businesses, real revenue — built and funded by GroAI, with them as the face. This is a small selection.

PREPARED FOR

Ola & Dan Osborne

FROM

John Rae · CEO, GroAI

DATE

September 2026

CASE STUDY · COACHING → A REAL BUSINESS

Ryan Hamilton

@ryanhamiltonn_ · Growth Rooms · fitness & coaching

We built Ryan **Growth Rooms** — his growth partnership for coaches: virtual rooms, systems, modules, structure. The engine that turns his audience into paying, recurring clients — largely automated, with Ryan kept as the face and the authenticity.

The point: not content, not a campaign — a real business that earns while Ryan trains, coaches and lives his life. It's since grown into a physical gym too.

GROWTH ROOMS — BUILT BY GROAI

WHAT WE BUILT

Growth Rooms

An AI-driven coaching platform — virtual rooms, modules, onboarding, client comms and sales, running in the background.

HIS ROLE

~1% of the work

Ryan stays the face. The system does the heavy lifting; he stays authentic.

THE OUTCOME

He opened a gym

The online business grew into a physical one — Ryan now has his own gym off the back of it.

From an audience to a **coaching business** — and then a **gym**. Built by GroAI. Ryan is the face.

CASE STUDY · SOCIAL + AI AT SCALE

Louise Thomson

@lou1sethomson · @lou1sethomsonx · creator & social

We run Louise's **social media and content with AI behind it** — the strategy, the system and the output that turns attention into sales. When it lands, it **really** lands.

18.3M

VIEWS ON A SINGLE TIKTOK SHOP POST — FOR A PRODUCT

LOUISE THOMSON ACADEMY — BUILT BY GROAI

WHAT WE DO

Social + AI

Content engine, posting system and shop-driving strategy — run with AI, not guesswork.

WHY IT MATTERS

Attention → sales

One post at that scale, pointed at a product, is the difference between a following and a business.

ALSO BUILT

A full academy

We've built Louise a complete creator academy & directory on top — courses, membership, the lot.

The point: reach on its own is vanity. We build the system that turns a moment like 18.3M views into recurring money.

AND HONESTLY — THIS IS THE SMALL SIDE

Ryan and Louise are **two of many.**

We build and run these systems across completely different worlds. Same playbook, different faces and sectors — which is exactly why we can say Dan's version isn't an experiment. It's a **proven process.**

VALUE OF THE SYSTEMS WE
BUILD — PER CLIENT

Already
built

PROVEN & RUNNING, NOT
THEORY

We fund it

THE INVESTMENT COMES
FROM US

What this means for Dan: we're not learning on him. We bring a system worth tens — into hundreds — of thousands of pounds, already proven across sectors, and we invest in building his. He gets the finished thing, not the trial run.

Different faces. Different sectors. **The same process that works.**

WHAT THIS LOOKS LIKE FOR DAN OSBORNE

Start with fitness.
It doesn't stop there.

The obvious first build is **Dan's online fitness & training plans** — the same engine we built for Ryan, at Dan's scale. But it's a platform, not a product, so it grows.

PHASE 1

Online fitness & plans

Training and nutrition plans, coaching and a members' community — sold and delivered automatically, with Dan as the face.

THEN

Whatever suits Dan

Courses, product lines, an app, live events, brand partnerships — the same platform extends into anything that fits him.

THE DEAL

We build & fund it

The investment is ours. Revenue-share partnership. Nothing for Dan to pay, and ~1% of his time.

FOR YOU, OLA

A campaign too

We'll wrap a proper launch campaign around it — so there's the campaign-led activity you know, plus the business underneath.

In one line:

 we invest and build Dan a real, recurring-revenue business he barely has to touch — and we market its launch like a campaign. He earns from what it makes; we carry the cost and the work.

LET'S HAVE A LOOK TOGETHER

Thirty minutes. That's all it takes to get it.

A quick call with me and Dan. I'll walk you through exactly what we've built for others, show you the systems live, and model the real numbers for Dan — no fluff, no obligation. If it's not for him, no harm done.
