

AI AUTOMATION · FOR NG HOMES

Save money on every repair. And every call.

One AI system, built by GroAI — a Glasgow studio, for a Glasgow institution. It answers every repair report, rent query and enquiry the moment it arrives — day or night — cutting the cost of handling them and handing your team back their time.

PREPARED FOR

NG Homes · North Glasgow HA

September 2026

THE CHALLENGE — WHAT IT COSTS

Every repair costs more than the fix.

A tenant taps "report a repair" — and it still lands on a person to answer, log, triage and book. Thousands of times a year. Add rent queries, applications and enquiries, all through **one line, open just Mon–Fri 9–4.30**, and the cost of simply **handling contact** quietly runs into six figures.

WHEN TENANTS CAN REACH YOU

OPEN · 37.5 hrs

Mon–Fri 9–4.30

CLOSED · 130.5 hrs / week

Evenings, weekends & peaks — a missed call is a job tomorrow

Only 22% of the week.

Repairs don't wait for office hours — but right now they have to.

YOUR APP — EVERY TAP STILL ENDS WITH A PERSON

~5,450 Homes to look after	~50,000 Calls a year (est.)	~£5 Staff cost per call handled	~£250k A year, just to answer
--	---	---	---

The demand is 24/7.
The cost of handling it is every day.

NG HOMES

THE BOTTLENECK

WHAT WE'D BUILD

An AI team that never **clocks off.**

Four connected systems, built for NG Homes and plugged into the tools you already use — repairs first, because that's where the volume and the cost sit.

01 · SAVES THE MOST

Repairs triage & booking

Takes the report, categorises it — emergency, urgent or routine — books the slot and confirms it, straight into your repairs system. No staff time on routine logging.

02

24/7 voice & web agent

Answers every call and web message the second it arrives — plain, patient language, any hour. No queue, no voicemail, no missed jobs.

03

Tenant comms, automated

Rent reminders, arrears outreach, appointment confirmations and updates — sent for you, tracked, logged to the tenancy.

04

Documents & reporting

Letters, notices and the regulator (ARC) returns drafted automatically from your own data — ready to check and send.

Built into your world, not bolted on: it connects to your housing-management and repairs systems, follows your policies and tone, and logs every action against the tenancy — a clean audit trail for your team and the regulator.

One system. Every channel.
Working while you sleep.

4-IN-1
BUILT FOR NG HOMES

HOW IT WORKS

Every tenant answered in seconds.

The tenant just talks — the same way they would to your team. The AI understands, handles what it can, logs everything, and passes anything sensitive to a person with the full story attached.

1 Tenant makes contact Calls or messages — any hour	2 AI answers instantly No wait, no queue	3 Handles the request Repair, rent, application, advice	4 Logs to your system Full record on the tenancy	5 Escalates when needed To your team, with context
--	---	--	---	---

WHAT IT HANDLES ON ITS OWN

- Report a repair
- Repair status
- Rent balance
- Make a payment
- Apply for a home
- Application status
- Report ASB
- Money-advice signposting
- Factoring queries
- Out-of-hours emergencies

Your team stays in control. Anything sensitive — a vulnerable tenant, an arrears conversation, a complaint — is handed straight to the right person with everything already captured. The AI carries the volume; your people carry the care.

It handles the routine,
so your team can handle the tenant.

HUMAN + AI
YOU STAY IN CONTROL

THE IMPACT — MONEY SAVED

About **£175,000**
back a year.

Illustrative and deliberately conservative, for an association of your size. Automating the routine cuts the cost of handling contact — with the biggest single win on repairs.

£175k a year in staff time & handling costs handed back (est.)

~£80,000

Saved on repairs reporting & triage alone

~70%

Of contact handled start-to-finish by AI

22% → 100%

Of the week tenants can reach you

And it protects what you're proud of. You already complete **90.1% of repairs right first time** — above the Scottish average. We protect and extend that: cleaner reporting, fewer failed visits, faster response — straight into your ARC and satisfaction scores, at a lower cost to deliver.

YOUR PUBLISHED PERFORMANCE — WE BUILD ON IT

Spend less on the phones.
Spend more on the tenants.

~£175k / YR
HANDED BACK

WE ALREADY DO THIS

Saving time & money across industry.

This isn't a first attempt. We build and run automation systems for established companies across very different sectors — the same engine, tuned to each. A selection:

Volt Group

ELECTRICAL

Rise Utilities

UTILITIES

Limitless Group

CONSTRUCTION

Caro Bathrooms

RETAIL & FIT-OUT

Nuwire

ENERGY & WIRING

Imperial Decor

INTERIORS

+ many, many more — from fire & security to professional services

£10k–£100k+ Value of the systems we build, per client	Proven Built & running live, not theory	Every sector Same engine, tuned to each
---	---	---

Different industries. Same result:
time saved, money saved.

PROVEN
ACROSS THE BOARD

WHY GROAI

A Glasgow studio, built for this.

You've served North Glasgow since 1976 and you outperform the Scottish average. Our job is simple: **protect what you've built, and cut what it costs to run.** We handle the build, the integration and the training.

About ng homes

Est. 1976
Original Committee - Mansel and St Monance

NG HOMES · SERVING THE
COMMUNITY SINCE 1976

LOCAL & ACCOUNTABLE

On your doorstep

A Glasgow studio working with a North Glasgow institution — close, accountable, invested in the community you serve.

SAFE & AUDITABLE

Built for a regulated world

Follows your policies, logs every action to the tenancy, keeps your team in control of anything sensitive.

START SMALL — PROVE IT, THEN SCALE

The first step is a 30-minute conversation and a look at your call and repairs data. We come back with the numbers for NG Homes specifically — what we'd automate first (repairs), and the exact time and money it hands back. Then a pilot on one line before it goes wider.
